

ERO Working group – Continuing Medical Education in Dentistry REPORT - Plenary session 2017 - Genève/Switzerland

ERO WG Continuing Medical Education in Dentistry would like to report;

Activities of the WG Continuing Medical Education in Dentistry will continue to finalise as below mentioned;

1. Proceeding the action plan regarding the WG focus, within the approval of the ERO Board, a new Project constituting a frame program is currently being prepared as a draft for getting finalised and presented. As it was mentioned in ERO Report in Poznan, to realise and activate that ERO pointing out the vitality of the continuing medical education in dentistry for the advocacy of global health we have induced the activities towards to raise the awareness of dental profession on the relationship between oral health and general health; improve collaboration and synergies between different health professionals. To enhance the extended role the current project is a proposal of lecture topic template about oral and general health related medical topics for the ERO countries. These topics were already discussed and finalised including the most preferred and identified regarding the data obtained from the ERO countries before circulated to NDAs of the member ERO countries for inclusion in their CE ac-

tivities or NDA congresses and may acknowledge as ERO-FDI SESSION. As being the volunteer contributors we believe that the recent development of the route on continuing education regarding the multidisciplinary approach to maintain oral health as an integral part of general health will assure the awareness as a solid state through ERO's strength and willing to raise it further.

2. WG Continuing Medical Education is working on a new evaluation survey to assess "best model" to provide effective and integrative CE activities to reach the dental profession for updating the medical continuing professional development. The survey is planned to be distributed online among FDI-ERO member countries to reach the highest participants to evaluate and will be finalised in WG meeting and distributed after finalised.

Proceeding with all participating members confirmation of ERO WG Continuing Medical Education in Dentistry, I would like to mention all the above mentioned topics will be discussed during the WG meeting scheduled during the ERO Plenary Session in Genève.

Assoc.Prof.Dr.Hande Sar Sancakli

Chair of the ERO WG Continuing Medical Education in Dentistry
