

The European Regional Organization ERO stimulated by the expressive changes in the gender structure of dentists established a working group Women in Dentistry.

FDI Women Dentists World Wide exists to co-ordinate the activities of the national groups: promote the collection of information about women dentists and their patterns of working; address inequalities where they exist; facilitate contacts between women worldwide and enhance their full participation in all branches of the profession.

Kuala Lumpur Declaration, 2001

The ERO Working group Woman in dentistry is established in accordance with Kuala Lumpur Declaration and the FDI Constitution (FDI Constitution, Chapter VI). Working Group WiD is set up and composed of internal (NDA) and external members nominated by the Plenary Session.

Vision

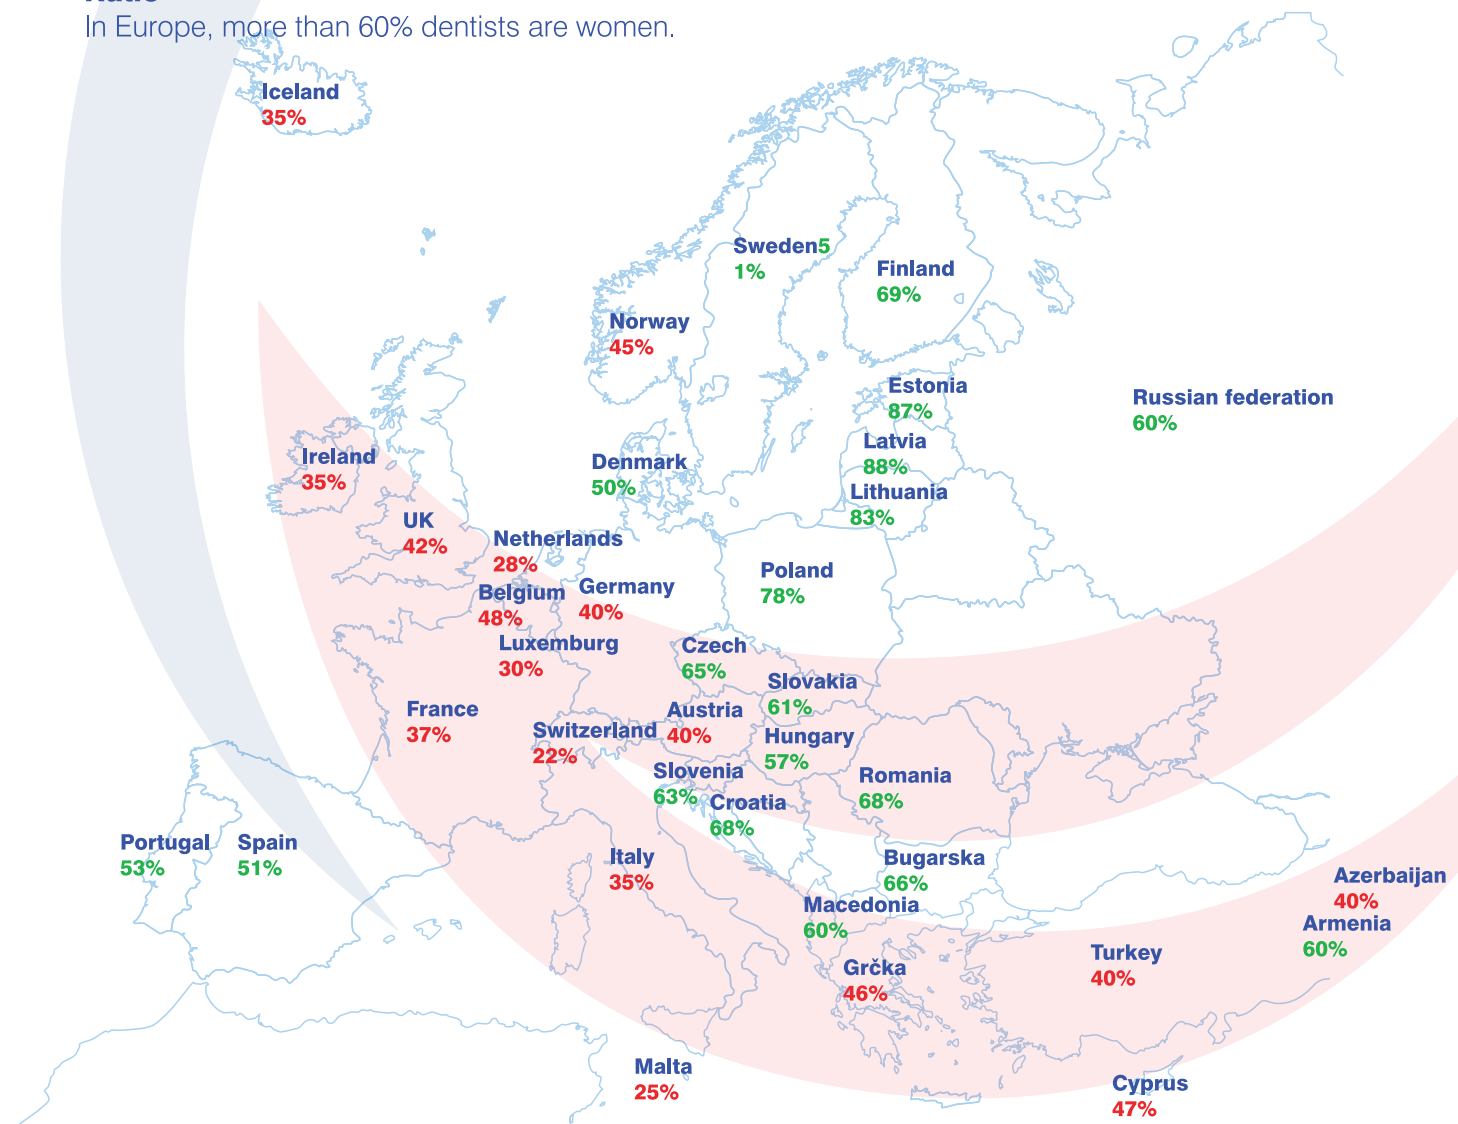

The face of dentistry is changing — and women want the full participation.

Mission

The mission of the WG Women in dentistry is to organize the network of cooperation and support between female dentists in Europe.

Ratio

In Europe, more than 60% dentists are women.

Aims and Objectives

- make the profession conscious about the phenomenon of the feminisation of the dental profession
- quantify it and gather the data
- look to the differences between men and women practice and their consequences
- gather information about the actions taken in relationship with the women dentists by their dental associations.

Highlights

WG Wid collects and reports the data about:

- Work conditions - retirement, maternity leave
- Salary
- Earnings
- Postgraduate education
- Position in the Universities
- Education
- Management
- Making decision level

Partnership with FDI Section Women dentists worldwide:

- Propose the topics for the World Forum
- transfer of experience
- propose the speakers
- propose awards

Communications

Comprehensive information about WG Wid (reports, contact details of themembers and members etc.) can be found at the Organization's website: **www.erodental.org**
