« Ageing Population »

Annual report 2024

Members : Jean-Philippe Haesler, chairman (Switzerland), Taner Yücel, supervisor (Turkey), Mick Armstrong (United Kingdom), Alessandro Berto (Italy), Sophie Dartevelle (France), Alexandre Deza (France), Michael Dierks (Germany)

Since our last spring meeting in Cyprus, the working group has met face-to-face in Istanbul on the occasion of the FDI Annual Meeting, and on several occasions by videoconference. We are in the process of finalizing the “senior toothbrushing” web page. We remind you that the aim of this web page is to support caregivers in brushing the teeth of dependent people. This page was created in collaboration with an IT company based in the Czech Republic. The quality of all graphics has been greatly enhanced, and short videos have been integrated. The web page will be available in fifteen languages! The working group would like to take this opportunity to sincerely thank all the associations who have provided translations.

As soon as this project is completed, the working group will turn its attention to nutrition for the elderly. As the CED has already done a great deal of work in this field, and in order to avoid duplication, we will be seeking collaboration with the relevant CED working group, and plan to propose to them the creation of a new, attractive web page to share this information with the population concerned. This will be the main theme of the working group's meeting in Amlmaty, and the first contacts with the CED will be made at its spring meeting in Gdansk.

April 2025

Jean-Philippe HAESLER (chairman)
