Date of Submission: 24.02.2025

Instructions

Please complete this form clearly and concisely. Where applicable, you may attach additional documents or provide references. If a section is not applicable, please indicate "N/A".

1. Changes in the Association and Its Organisation

Please describe any significant structural, strategic, leadership, or membership-related changes during 2025.

There were no significant changes regarding structure, leadership or membership-related during 2025. Our organizational chart remained the same and can be found on our website:

<https://asrm.md/vezi-toti-membri/>.

2. Main Concerns

Please list the three most important concerns currently facing your association.

- a) Lack of interest on the part of citizens in oral health and its importance.

 - b) Aggressive marketing promoted by some dental clinics that do not necessarily offer patients the most ergonomic treatments.

 - c) The low level of prophylaxis in the country even though various national programs are being tried to be introduced
-

3. Key Discussion Points

Please indicate three topics or issues you would like to discuss at international level.

- a) The importance of prophylaxis in dental world.

 - b) The management of dental clinics and team.

 - c)
-

4. Trends and Developments

Please describe relevant trends and developments in the following areas:

- a) **Professional Politics**

b) Health and Social Politics

People start realizing how important prevention and treatment is, however it's hard for the elder class to implement these activities in their routine.

c) Educational Politics

Almost everyone consumes a lot of content from social media and this is their main source of information when it comes to different areas in life, not only dentistry. However, we think it's important to select and to choose which content should be allowed and not.

d) Insurance System

(including public health insurance and private insurance schemes)

In our country we have health insurance that covers medical emergencies only. Anything else regarding prevention, treatment, each person should pay by themselves.

An idea of the development of this branch could be introducing some coupons or extra insurance for dental health and also for dental prevention.

5. World Oral Health Day Promotion

Does your association promote World Oral Health Day?

Yes No

If yes, please describe the type of activities (e.g. campaigns, events, media outreach, partnerships):

We do have different campaigns organised annually by our association with the help and collaboration of USMF “Nicolae Testemitanu”, stomatology faculty where a lot of teachers, students and volunteers are involved.

In 2025, there was a flashmob organized in the center of our capital, Chisinau, where students and teachers informed the people walking around the importance of oral health.

Also, we had a team that spread near campus buildings and they offered flyers and brochures to passersby with a small kit for oral care.
