

ERO report Dental Team working group - April 2026.

Working group leader: **Kristjan Gutmann**

Following the successful completion of the previous research topic by Doniphan Hammer, it was important to find a new topic that would shed light on the daily work and division of tasks of the dental team. At the working group meeting at the ERO autumn meeting in Shanghai, the topic “Bureaucracy and Documentation Responsibilities in the Dental Team” was chosen. The working group members felt that a closer examination of this topic would allow them to argue their views in their interactions with government and regulatory authorities. All working group members found that there was rather too much regulation, pointless documentation and requirements.

The first working group meeting took place online on December 8, 2025. At this meeting, the objectives and the desired final form of the study were defined. An offline meeting was also planned in Berlin in February 2026, but due to a combination of unfavorable circumstances, we were forced to hold this meeting online as well. At this meeting, we have already come to specific questions that could provide maximum information about the practices of ERO member states.

The presentation of the questionnaire will take place at the ERO meeting in Sofia.
