

## Letter of intent

Dr. Hans **SCHRANGL**, Austria

As member of the board together with the entire board my first aim will be to support the working-groups, intensify their collaboration and ensure that their results are respectively presented in Europe and worldwide.

Secondly, inside FDI ERO has to strengthen the European position and has to increase its influence in the selection of the themes, FDI is dealing with.

Thirdly, in the field of European politics I will try to intensify the positive way of discussing the relevant themes with CED, being also a board member of CED.

My personal credo for successful dentistry is the faithful partnership between patient and dentist. Every attempt to weaken or to disturb this relation –by politicians, economists, social security systems or private assurance companies - has to be fought by all means.
