WG DENTAL TEAM

The Board according the decision taken by the ERO Plenary in Bangkok and FDI Statement regarding the Dental Technician Profile, considered the possibility to find a common agreed profile useful for the needs of our profession.

WG DENTAL TEAM

It was explained the legal basis criteria for a free movement and establishment regulated professions for example PQD Directive in EU: scope for and definition of diploma, minimum standards in the training program, system of automatic recognition.

WG DENTAL TEAM

- DTs have already a clear independent professional role cooping with the dentist in oral health care in some member countries;
- DTs have already a clear learning outcome profile in some countries;
- DT Diploma is a Certificate according Bologna process in some member states too;

WG DENTAL TEAM

In some European Countries DT can work independently or as employee instead of the other members of Dental Team;

WG DENTAL TEAM

DT profile its a profile that belongs Level 5 of the European Qualifications Framework (EQF5). (Level 5 are comprehensive, specialized, factual and theoretical knowledge in a field of work or study, being aware of the limits of knowledge.)

WG DENTAL TEAM

For all of these reasons we started considering the respect the standards and decision of Oral Care Prevention Standard Systems in European Countries continuing on the path way to create a **new common agreed profile educated from dental professional associations : a tool to be used only if needed!**

WG DENTAL TEAM

WG already created a professional profile steps for education, training, for DCA , DPA , DH for the Dental Team and now for Dental Technician, totally under the umbrella and for the utility of the profession avoiding Bologna Process and Bachelloreates.

BIG QUESTION

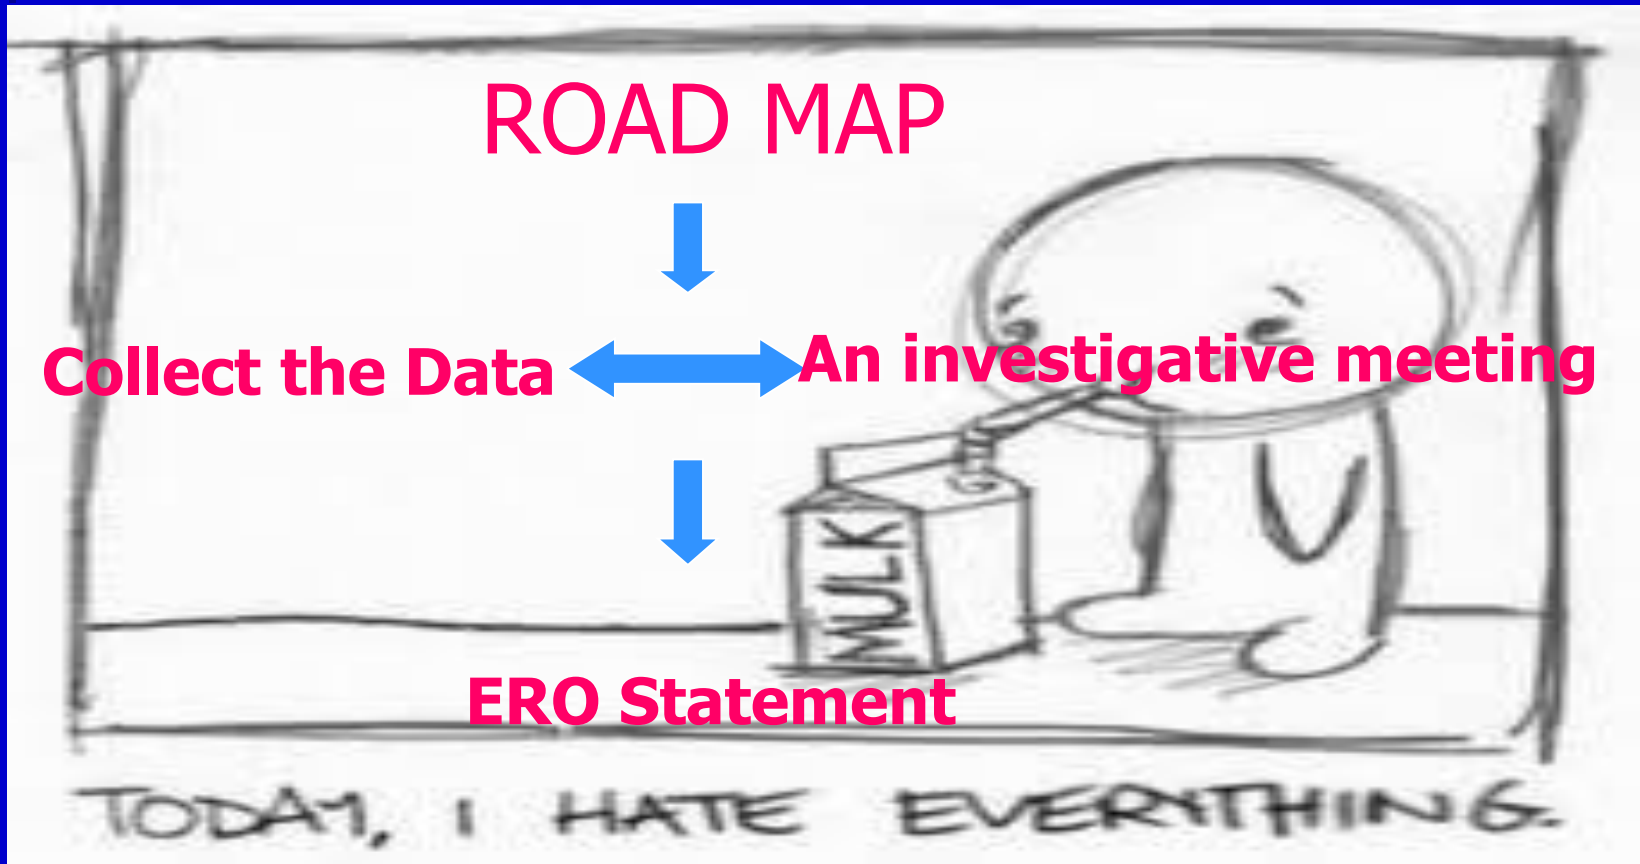

IS IT A MATTER OF

- Vocational training?
- Basic education and training?
- Population and Society needs?
- Dental market of the Country?
- Needs of politics?
- Evaluation of risk management?
- Distribution and dilution of risks?
- Evaluation of responsibilities?

IT WAS A CHALLENGE!!!

RESOLUTION

DENTAL TECHNICIAN PROFILE

FROM FDI STATEMENT of Bangkok

DEFINITION

- Dental laboratory technician: A member of the wider dental team even if he/she is not part of the practice staff of the Dental Team. Dental Laboratory Technician constructs and repairs custom made dental devices such as inlays, onlays, crowns, veneers, bridges, full or partial dentures, space maintainers, retainers, and labial or lingual arch wires, according to the dentist's prescription.

RESOLUTION DENTAL TECHNICIAN PROFILE

FROM FDI STATEMENT of Bangkok

The Dental Laboratory Technician should:

- Undergo lifelong continuing professional development including updated knowledge of infection control **procedures.**
- Provide the dentist with all necessary information about the laboratory work performed, all materials used, **including infection control**

RESOLUTION DENTAL TECHNICIAN PROFILE

HOME WORK

**We decided to add a proactive action to FDI
Statement**

**The Challenge for our profession is that we can't
be substituted !**

EVER!!!

RESOLUTION DENTAL TECHNICIAN PROFILE

HOME WORK

**We shall give our perspective view of
Dental Care.**

**It is not a merely matter of service but a matter
of care!**

ACKNOWLEDGMENTS

**Thanks for
your attention**
