ERO WG Integration

Basic education

ERO WG Integration

Regarding collaboration between ADEE and ERO and ERO WG Integration activity, we would like to include also integration work deals with basic education between Universities of ERO countries. The purpose of the activity is development of dental education in Eastern European countries of ERO. As final results of the work could be ***recognition of High Education Diplomas of some Universities of ERO***. We could start with one pilot project for one University of Eastern European country, and for the first to start to compare dental education between this University and one of the best University of 28 EU countries due to new EU directives of European standards of Dental Education.

This activity is appropriated to the new approaches to WG Integration activity on the base of country needs and could be apply in the same time of integration activity for prevention, CE and dental practice.

ERO WG Integration

Considering the reorganization of Integration activity after ERO WG Integration meeting in Tbilisi were focused on the problems which concern member countries:

- ✓ **Basic and Continuing education - the most actual issues due to the modernization of educational system in Russia, Belorussia**
- ✓ **Prevention - in Kazakhstan, Kyrgyzstan, Moldova and Russia**
- ✓ **Standards of dental practice - in Armenia, Russia and Uzbekistan**

ERO WG Integration

Standards of dental practice, exchange of ERO countries experience in the agenda of ERO WG Integration meeting in Poznan
