

About WG Integration Issues

Dr. Ilshat Yuldashev
the Kyrgyz Republic

The vision of Integration has recently been transformed - it had to happen.

- Questionnaire – CED Manual Survey – routine up-to-date procedure for European countries for checking conditions of dental care – in Europe. Distribution to countries f. USSR can serve as a screening of the conformity of the state of service in these countries with the level existing in Europe. Nobody says that the system of dental care in Europe is better or worse (Alma-ata 1978!). This is just checklist.
- The questionnaire - CED Manual Survey - allows to take advantage of the situation to compare and determine the difference in the structure, opportunities, legal bases on which associations work in Europe and the CIS, post-Soviet countries.

Perhaps another questionnaire is needed - about the problems and needs of the post-Soviet countries.

- Is there a need to compare the scheme of the educational process, (in the post of the USSR, a dentist is a doctor!)

- Postgraduate continuing education,

- Insurance systems in dentistry (the interaction between dentistry and the Ministry of Health has not yet been registered and is at an embryonic level).

OUTLOOK for the new EURO strategic plan:

- **1. To carry out the implementation through WG Integration of the main solutions of other working groups in the countries - new members of the EURO.**
- **2. Pay attention not only to the post-Soviet countries, but also to the newly joining the EURO.**

- **3. Find out the history of interaction between the EURO countries with the authorities and the Ministries of Health. What is the history of their influence and cooperation?**
- **4. It is necessary to find out - through which authorities, governments - EURO countries can make changes to the Dental structure, programs, postgraduate education, etc.**

- **5. Translation of the main EURO documents**
- **6. Create a project (Monika's suggestion)**
- **7. Questionary EU - overloaded, needs to be translated and sent out**

- **8. Situation is so, that in EURO - German-speaking countries -3, French-speaking - 1, English - international. It is necessary, at least for the period of adaptation and integration, to translate into Russian the main regulatory documents of the EURO. Describe the history of the development of dentistry in EURO.**

THE END!
