

Regional European Organisation of the FDI

National Report

Country: Armenia

Association: Armenian Dental Association

Venue: Yerevan

Year: 2012

Please classify your national report by following subjects:

- I. *Changes in the association and its organisation.*
On 18th of February, 2012 the accountable re-electoral conference of ADA was held, where a board was elected consisted of 39 persons and Ashot Gevorgyan was elected the president of ADA with 2 more years.
- II. *Trends and developments:*
 - *in professional politics - It is very difficult situation in the dental service of the country, as 18 stomatologs are for 10 thousand inhabitants and every year 500-600 students are graduating from many medical universities as well. Not having judicial levers, ADA is applying to many instances but these don't give any use as each institute and university has a high-ranking sponsor. We have offered to limit the licences but it is useless.*
 - *in health politics;*

- *in educational politics- All the doctors are overcoming a retraining every 5 years. Besides ADA is organizing different conferences, seminars and master classes, where are invited the best specialists from abroad.*
- *in the insurance system (incl. the public health insurance and private insurance schemes)- There is no insurance system in the country. Instead of it the country pays for the people in need in its own with its fixed price list.*

III. Further information (activities, concerns).

It is not the first year that I am advancing the question about the number of stomatologists but ERO and FDI have done nothing to help us till now.

I ask for your help up to the governmental instances.
