

ERO Working Group
Continuing Medical Education in Dentistry

ERO Plenary Session 2018
Salzburg, Austria

ERO Working group – Continuing Medical Education in Dentistry

REPORT – Plenary session 2018– Salzburg/Austria

ERO WG Continuing Medical Education in Dentistry would like to report; Activities of the WG Continuing Medical Education in Dentistry will continue to finalise as below mentioned;

1. Through the Proceedings on the action plan of WG, following the approval of the ERO Board and the plenary, a new consent and protocole between ERO and FDI European Regional CE Directory was assigned. The protocol and the consent will be both sent by the ERO Board beside presenting during the plenary presentations for call.
2. With the acceptance of FDI Council, ERO C constituting a frame program is currently being prepared as a draft for getting finalised and presented. As it was mentioned in ERO Report in Poznan, to realise and activate that ERO Continuing Medical Education in Dentistry Declaration was accepted to be a policy statement which was editted by Hande Sar Sancakli who is the responsible education committee member to proceed. DRAFT Version will be shared with the NDAs through the routine PS procedure.
3. The latest work initiated by the WG Continuing Medical Education in Dentistry; a new evaluation survey to assess "best model" to provide effective and integrative CE activities to reach the the dental profession for updating the medical continuing professional development has been distributed online and

the link will be shared among FDI-ERO member countries. Results will be analysed and presented in Buenos Aires ERO Plenary to reach the highest participants evaluation.

Proceeding with all participitating members confirmation of ERO WG Continuing Medical Education in Dentistry, I would like to mention all the above mentioned topics and further new projections will be discussed during the WG meeting scheduled during the ERO Plenary Session in Genevé.

Assoc.Prof.Dr.Hande Sar Sancakli

Chair of the ERO WG Continuing Medical Education in Dentistry

We believe that

continuing medical education regarding the multidisciplinary approach to maintain oral health as an integral part of general health will assure the awareness as a solid state through

**ERO's strength and willing to raise it
further....**

1

- Pointing out the vitality of the CME for the advocacy of global health
- Raising awareness of dental profession on the relationship between oral health and general health;
- Improve collaboration and synergies between different health professionals

ERO Continuing Medical Education in Dentistry Session template

ERO Continuing Medical Education in Dentistry Session template

- Panel or Forum format
- Oral and general health related medical topics (regarding the topic list as the recent survey data)
- Including 2-3 Lecturers
- European Lecturers, Medical Association collaborators
- Interprofessional involvement
- ERO countries for inclusion in their CE activities or NDA congresses

and

may acknowledge “ERO SESSION”

ERO-FDI (ERO Continuing Medical Education in Dentistry WG)

&

FDI European CE Regional Directory Collaboration

Pointing out the vitality of the Continuing Medical Education for the advocacy of global health and raising awareness of dental profession on the relationship between oral health and general health; ERO-FDI strongly supports to improve the collaboration and synergies among and between all health professionals. In order to implement and activate the objective of the ERO through the NDAs Continuing Education events, member NDAs are asked to include a session entitled “FDI-ERO Session-Continuing Medical Education in Dentistry” in their CE events or congresses. Regarding the approval by the ERO plenary, a limited number of sessions will be supported through announced budget.

ERO Board appreciates Prof.Dr.Alex Mersel for his collaboration with WG Continuing Medical Education in Dentistry regarding the projections to support ERO-FDI sessions through the FDI CE Regional Programme Budget. NDA Session proposal will be called by ERO and event scheduling and programme will be organised by ERO Board/FDI Europe CE Regional Directory/WG Continuing Medical Education in Dentistry regarding the applications. FDI Speaker invitation rules will be valid for the financial support criteria for the lecturer. (Flight expenses and per diem coverage, no honorarium, accommodation expenses by the hosting NDA).

ERO-FDI Working Group Continuing Medical Education in Dentistry

ERO-FDI Continuing Medical Education Session
Organization Scheme

Pointing out the vitality of the Continuing Medical Education for the advocacy of global health and raising awareness of dental profession on the relationship between oral health and general health; ERO-FDI strongly supports to improve the collaboration and synergies among and between all health professionals. In order to implement and activate the objective of the ERO through the NDAs Continuing Education events, member NDAs are asked to include a session entitled “FDI-ERO Session-Continuing Medical Education in Dentistry” in their CE events or congresses. Regarding the approval by the ERO plenary, a limited number of sessions will be supported through announced budget. FDI European Continuing Education Regional Director Prof.Dr. Alex Mersel has started collaboration with ERO WG to support the invitation of one lecturer for each planned session by FDI European Regional CE Programme.

ERO Board will call for session proposals for NDA Congresses /CE activities for applications to be supported by FDI European CE Directory for 2018-2019.

The session template and supporting criteria will be as mentioned below;

Session Structure:

- 1-3 hours session/panel/forum on the specific medical-related topics
- International or National Lecturers due to format of the session design
- Lecturers could be invited either by NDA or ERO

Financial support:

- ERO budget organisation
- ERO/FDI Europe Regional Directory budget designed for the current project
- NDA support for their national/international lecturers in their congresses/CE events

Financial support criteria:

- Flight expenses and per diem coverage
- No honorarium
- Accommodation expenses by the hosting NDA

*FDI Speaker invitation rules are valid through the organisation
Please provide the below mentioned information for lecturer support;

NDA applications for ERO-FDI Session

Name of the Event (congress,CE event,symposium etc..)

Date of the Event

Venue

Call for applications...

Current project;

Evaluation of the learning formats for Continuing Medical Education in Dentistry

2

to assess “best model” to provide effective and integrative CME activities to reach the the dental profession for updating the medical continuing professional development

Evaluation of the learning formats for Continuing Medical Education in Dentistry

to highlight the ERO member NDA dentists' preferred learning format for CME activities which they felt most effective in helping them retain information or change their medical attitude in practice.

- On-line survey
- Distribution among FDI-ERO member countries

Medical education in dentistry

The General Assembly of the FDI World Dental Federation,
gathered at the 104th FDI Annual World Dental Congress in Poznań, Poland
between 6 – 10 September 2016

taking into consideration that

- the importance of oral health has been underlined in a number of important documents adopted by international organizations – one of them being the FDI Istanbul Declaration of 2013,
- oral health is an integral part of general health and the role of dental practitioners is not limited only to maintaining oral health of their patients but also their overall health and well-being,
- dentists can significantly contribute to improve their patients' overall health by taking on new tasks such as screening and monitoring non-communicable diseases,
- to fulfill these tasks dental education has to include more medical knowledge than nowadays,

recommends that

- national dental curricula should be reviewed in order to deepen medical sciences education,
- continuing education in dentistry should include medical topics allowing practicing dentists to upgrade their clinical experience and competency in medical fields,
- collaboration with medical scientific associations should be strengthened and joint educational programmes should be developed.

FDI 2018 General Assembly Buenos Aires

FDI DRAFT POLICY STATEMENT

Continuing Medical Education in Dentistry

Submitted for adoption to the General Assembly: September 2018,
Buenos Aires, Argentina
Working Draft 5 PS by EdC

CONTEXT

Oral health is an integral component of general health. Current and future dentists play an important role in maintaining the overall well-being of their patients, as underlined in the FDI Istanbul Declaration. Today's oral health professionals can be described as "front-line" medical professionals in prevention, early detection, and monitoring of both oral and systemic diseases thus enabling them more involved in assessing and ensuring the overall health of their patients.

Dentistry is a unique profession that can contribute to improving patients' overall health. In addition to maintaining their patients' oral health, oral health professionals can take on new tasks, such as screening for and monitoring of noncommunicable diseases, and educate their patients on the importance of early screening, monitoring and prevention of diseases.

SCOPE

The dental education system should be based on scientific rationale and evidence, in line with contemporary dentistry. It should incorporate other medical advances besides dentistry with an emphasis on clinical applications by focusing on prevention, promotion of common risk factors, and early screening and referring. The dental education system should also help with regular monitoring of the most common diseases prevalent in the community practice.

There is a need for lifelong learning for continued competence and proficiency. Continuing medical education (CME) in dentistry is vital to enable oral health professionals to review and upgrade their clinical experience and competency in other ever-evolving medical fields, depending on the legal system operating in a country.

DEFINITIONS

Continuing medical education in dentistry seeks to fulfil the criteria to integrate oral health and general health, by bridging the conjectural gap between dentistry

3

and medicine. It is essential for oral health professionals to have the knowledge and competencies to address broader issues and tasks in medical care, including taking action on the social determinants of health to contribute to their patients' quality of life.

PRINCIPLES

The primary principle of CME in dentistry should aim to maintain and develop future dentistry based on evidence and science for optimum healthcare. This can be done by addressing the needs for continuing development with regard to the new trends on medicine, dentistry and epidemiology. It should take into consideration the general health needs of the patient through broader medical knowledge and enhanced skills and competences related to dental sciences.

A special CME with a focus on local epidemiology of communicable and noncommunicable diseases should be prepared for National Dental Associations, mainly when outbreaks or unusual patterns emerge.

POLICY

FDI calls on National Dental Associations to highlight that:

- Oral health is an integral component of general health, and the role of dental practitioners is not only limited to maintaining the oral health of their patients but also their overall health and well-being.
- Oral health professionals can significantly contribute to improving their patients' overall health by taking on new tasks, such as screening for and monitoring of noncommunicable diseases.
- Dental education must include more medical knowledge to fulfil the tasks at stake.

In light of the enlarged scope of the profession, FDI recommends that:

- National dental curricula (under- and post-graduate, including specialization) be reviewed to deepen medical sciences in dental education, by including medical topics and allowing practicing dentists to upgrade their clinical experience and competencies in medical fields.
- Collaboration with scientific medical associations be strengthened and joint educational programmes be developed.

This statement should be read in conjunction with FDI's Policy Statements on Basic Dental Education and Continuing Dental Education, along with the supporting references.

KEYWORDS

Continuing education, continuing medical education, dentistry, medicine

DISCLAIMER

The information in this Policy Statement was based on the best scientific evidence available at the time. It may be interpreted to reflect prevailing cultural sensitivities and socio-economic constraints.
