

ERO-FDI Working Group "Liberal Dental Practice in Europe" Report Salzburg 2018

After several months of reviewing our study we are finally able to present in Salzburg our publication under the modified title:

"Is liberal independent dental practice in danger? Assessing forms of dental practice in the ERO zone of the FDI World Dental Federation"

Our purpose was to find out which are the main forms of dental treatment existing in the ERO member states under special attention that the principles of liberal dental practice and dental ethics will not be destroyed due to economic interests.

As the WG members agreed in Madrid, we organized a WG meeting before our plenary session in Salzburg to discuss following steps in evaluation in this item to present and discuss them during our plenary session in Austria.

This WG meeting took place at 17th of March 2018 in Hamburg.
