# Guidelines for primary prevention of cardiovascular diseases: ERO position paper for oral health professionals

## *WG Prevention*

*ERO Plenary Session  
Sofia 14th-16th April 2011*

# *Guidelines for primary prevention of cardio-vascular diseases: ERO position paper for oral health professionals*

---

Guideline provides an overview of the evidence on established and emerging risk factors for CVD, to provide evidence-based recommendations for the reduction of risk of CVD

- Systematic literature reviews (covering the time since the last review was published in 2001 up to March 2011)
- Reference to previously published guidelines

# Systematic Literature Reviews

**Limits:** last 10 years

**Key Words:** cardiovascular disease, oral health, guidelines

226 references, 48 selected and analysed, 35 identified

*Guidelines for primary prevention of cardio-vascular diseases: ERO position paper for oral health professionals*

---

## Next Step

- Expert opinion to summarize existing evidence and indicate gaps in current knowledge
- Formulate recommendations
- All members of the writing group had the opportunity to comment on the recommendations and approved the final version of this document.

# *Guidelines for primary prevention of cardio-vascular diseases: ERO position paper for oral health professionals*

---

**ERO Workshop on Recommendations for Prevention of CVD - Geneva, 2011-**

**Objectifs:** Répondre aux quatre questions suivantes :

- La pratique de l'antibioprophylaxie de l'endocardite infectieuse à l'occasion d'un geste à risque chez un patient ayant une cardiopathie à risque reste-t-elle justifiée ? Faut-il reformuler les objectifs de l'antibioprophylaxie de l'endocardite infectieuse ?
- Y a-t-il des données nouvelles concernant les cardiopathies à risque ou les gestes et situations à risque ?
- L'évolution de l'épidémiologie de l'endocardite infectieuse doit-elle conduire à modifier les recommandations européennes concernant les modalités de l'antibioprophylaxie ?
- Comment assurer le dépistage, le suivi et l'information des patients ayant une cardiopathie à risque ?

# *Guidelines for the primary prevention of cardio-vascular diseases: ERO position paper for oral health professionals*

---

Les recommandations finales précisent :

- les groupes à risque
- les mesures d'hygiène indispensables
- la prophylaxie en cas de gestes invasifs buccodentaires et autres que buccodentaires
- les modalités de l'antibiothérapie

Writing group members were nominated by the WG Prevention on the basis of their previous work in relevant topic areas
