

ERO/CED Joint Workforce on AMR

A podcast on AMR was released at the start of the World Antimicrobial Awareness Week (November 18th 2020). The link was sent to ERO, CED, FDI and made available for member associations.

The ERO/CED Joint Workforce met online on February 22, 2021. The request of the ERO board to create a basic publication was welcomed. It was decided that such a publication should be as short as possible, preferably in the form of a leaflet. A draft has already been written and will be presented to the members of the Joint Workforce for discussion on the online meeting scheduled for April 6.

Dr. Henk Donker

Chair of the Working group Ageing Population and of the ERO/CED Joint Workforce on AMR
