

WOMAN IN DENTISTRY

VESNA BARAC FURTINGER
ANNA PATRIZZIA UCCI
ELENA IVANOVA
SABINA ALYEVA
ANNA LELLA

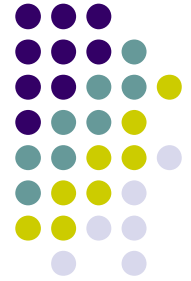

PHASE ONE

- quantify it and gather the data
- make a network of women dentists in European countries
- identify the difference in status between men and women practice and their consequences
- make the profession **conscious** about the phenomenon of the feminisation of the dental profession

DONE

Research methods

- Literature search
- Official and institutional data sources (questionnaire)

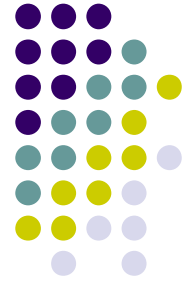

Informations from woman dentists organizations (formal and informal)

The main problems

- Deficient post-graduate education
- Inequality in specializations
- Poor representation on making decision levels

PHASE TWO

- Creating a new questionnaire :
simple and understandable, to updating and
compare previous results

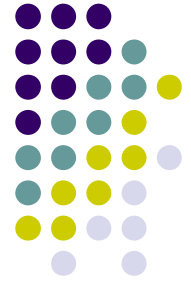

Questionnaire

- General informations about percentage representation in recent dentists workforces (with age groups)
- Specialists and residents (age groups)
- Informations about the students (trends for the future)
- Dentists employed as the univerity staff (age groups and specializations/departments)
- Making decision levels in NO and universities
- Entrepreneurship

Ultimate goal

- Publish the collected data

THANK YOU FOR YOUR ATTENTION
